Full-Stack Developer with a knack for programming and problem-solving, delivering clean, intuitive, and user-centric solutions. Passionate about bridging front-end aesthetics with back-end logic to create seamless, high-impact applications.

WORK EXPERIENCE

Data Automation Engineer

APR 25 - PRESENT

Mystic Panels and Planks, Mumbai

- Developed and maintained data pipelines to integrate TallyPrime with Google Sheets and Google BigQuery.
- Automated data extraction, transformation, and loading (ETL) processes using SQL and Google Apps Script.
- Created interactive web app tables in Google Sheets for dynamic data visualization and reporting.
- Collaborated with stakeholders to ensure data accuracy and timely updates for business analytics.

Digital Marketing Intern

JULY 24 - DEC 24

Stealth, Mumbai

- Gained hands-on experience in web optimization and design at Stealth, a global design agency. Expertise in Search Engine Optimization (SEO) to improve website visibility and performance. Proficient in Figma for UI/UX design, prototyping, and wireframing. Skilled in WordPress for website development, content management, and customization. Strong command of HTML for coding, layout design, and enhancing website functionality.

EDUCATION

Bachelor of Computer Engineering

2022-2026

AtharvaCollegeOf Engineering

CGPA - 8/10 till now

Coursework- Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming (Java), Software Engineering, Microprocessors, Artificial Intelligence

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript, Basics of Java and Python, Appscript, MySql(basic)

Front-end technologies: React.js, HTML, CSS, Javascript(ES6), Tailwind CSS

Back-end technologies: Node.js, Express.js, MongoDB

Devops and tools: Git, VS code, Vite, Npm, Google Big query, Google cloud platforms

PROJECTS

QUICKCHAT

Technologies: React.js, Express.js, Node.js, MongoDB, Socket.io

- Developed a real-time MERN web application featuring end-to-end image sharing and chat functionality.
- Built with MongoDB, Express, React, and Node.js, the solution integrates Socket.IO to establish persistent WebSocket connections for instant bi-directional communication, enabling users to send messages and images in real-time.
- This project not only streamlines workflows but also delivers a user-friendly, interactive experience that exemplifies clean architecture and productivity-focused automation.

EXTRA CURRICULAR

Upper primary Scholarship examination-250/300

Secondary Scholarship examination - 238/300
